

SMI WALL PLATES

DESCRIPTION

These wall plates are intended to facilitate the installation of POF (Plastic Optical Fiber) for home networking. The SMI receptacle is part of the wall plates and is intended to mate with the SMI POF cable assemblies. The POF cable is terminated to the SMI plugs also produced by ELII. The termination of the POF to the plugs can be done in the field using a simple hand tool or finished SMI cable assemblies already terminated can be supplied by ELII.

The wall plates are offered in three configurations:

- WALL PLATE WITH SMI ONLY
- WALL PLATE WITH SMI AND CAT5e RJ45 JACK
- WALL PLATE WITH SMI AND F COAX INTERFACE

The products will be shown at OFCNFOEC booth number 3939 taking place in the San Diego, Ca. Convention Center in February 24-28, 2008
